

How to Generate a Replacement License Online (Rehosting)

You may rehost a single license file or multiple licenses files hosted to the same machine that will be rehosted to the same new machine. The steps are different for each type of rehosting, singular or multiple. If you have licenses on multiple LACs that need to be rehosted, you will have to rehost per LAC, saving the license file as a different name for each rehosted license. With the 2015 Intergraph License Administrator Tool, you can select Merge Licenses and follow the prompts to merge the licenses into a single license file. With older versions, you will have to manually append licenses to form a single license file.

1. Go to licensing.hexagonsafetyinfrastructure.com/flexnet/operationsportal/
2. Key in your LAC and select *Login*
3. Multiple licenses off same LAC all going to same new Host ID:
 - a. Select *Manage Licenses*
 - b. Check all licenses to be rehosted
 - c. Select *Consolidate*
 - d. The consolidated license will display with only two options, *Save to File* or *Email*
 - e. Do not select either of these options, instead go back to *Start Page* at the top of the page
 - f. Under *Manage Licenses*, select *Consolidated Licenses*
 - g. The Consolidated Licenses page will display
 - h. Select the licenses you just consolidated
 - i. Select *Rehost* (Note with this option you must rehost all of the consolidated licenses; you may not rehost a subset as you can with individual license rehosting)
4. Single Product Rehosting:
 - a. Select *Manage Licenses*
 - b. Check the license to be rehosted
 - c. Select *Support Actions*
 - d. Select *Rehost* (blue box above Support Actions)
 - e. Follow the prompts to rehost
 - f. Save or email the rehosted license
